

Armstrong Rhinofloor Contract Ranges – stain resistance notes

Armstrong Rhinofloor Contract ranges (Design & Flair) are protected by Armstrong Rhinogrip, which provide good levels of stain and scuff resistance for domestic applications.

In testing Rhinofloor Contract performed well against a range of hair colourants. However, as is the case with all flooring products, some hair colour products and dyes with intense colouration can create irreparable discolouration if not removed immediately.

Any spillage must be wiped up immediately with clean, warm water and mild detergent to limit staining.

Staining after cleaning may still occur with intense colours but will be reduced if spillage is cleaned away immediately.
